A diamond-shaped danger label plate announces, in the form of a pictogram, the predominant type of danger of the material transported. These diamonds are attached to each side and to the rear of the vehicle.

Symbol: Represents the danger and/or possible reaction(s) of the transported product. It quickly identifies danger. The example here is for a flammable product.

Number: Corresponds to the class of the product transported. The class identifies the nature / material of the product. There are 9 different classes. In the example attached, this is class 2 which corresponds to a "compressed, liquefied or dissolved gas under pressure".

Wormdrive clamps - ST series W1

This strong wormdrive clamp is suitable for high torque loads and complies with standard SS 2298. This clamp is not only very robust, but it will also last much longer compared to classic electroplating protection. The band with rolled-up edges ensures perfect clamping on the hose without damaging it. The compact screw and ratchet assembly and also the housing made from a drawn tube make this clamp highly torsion-resistant. The hexagonal head C7 allows standard tools to be used for mounting and removal.

- **Material:** Mild steel, all parts zinc plated
- **Fastening:** 7 mm hex head
- **Industry recommendations:** Agricultural applications, automotive industry and aftermarket, industrial sector hardware, DIY
- **Quality assurance:** SS 2298, DIN 3017-1

Wormdrive clamps - DD series W2 (12 mm)

This wormdrive clamp has a 12 mm wide band. It is manufactured in compliance with the European Standard DIN 3017-1, ensuring that the hose joins the connecting pipe end in a perfect tight fit. The band is pressed, non-perforated, folded up at the edges and has smooth inner surface. This allows the avoidance of hose damage. This clamp resists large torsional forces well and is not deformed due to the axial and radial forces acting during tightening.

- **Material:** Chrome steel AISI 430 (band & house), zinc plated screw
- **Fastening:** 7 mm hex head

Wormdrive clamps - D series W4/A2 (9 mm)

The band of this clamp is 9 mm wide, manufactured in compliance with the European Standard DIN 3017-1. This standard guarantees that the hose joins the connecting pipe end in a perfect tight fit. The band is pressed, non-perforated, folded up at the edges and has smooth inner surface. This allows the avoidance of hose damage. This wormdrive clamp resists large torsional forces well and is not deformed due to the radial and axial forces during fixing.

- **Material:** Stainless steel 300 series
- **Fastening:** 7 mm hex head
- **Industry recommendations:** Used in the marine, oil, gas and food sectors, as well as agricultural, hardware and industrial sectors, where higher corrosion resistance is required, but space and/or weight are at a premium
- **Quality assurance:** DIN 3017-1

Mini clamps - M series W1 and W4/A2 (9 mm)

This hose clamp is for a small clamping range and equipped with a short bolt, making it perfectly suitable to clamp hoses with thin walls. such as fuel hoses.

It is often called fuel hose clamp. The rounded edge prevents the clamp from shearing into the hose.

- **Material:** W1: mild steel, all parts zinc plated
W4/A2: stainless steel 300 series
- **Fastening:** M4 screw (7 mm hex head)
- **Industry recommendations:** Ideal for small bore hoses with relatively low pressures, where little clamping force is required. Used in low pressure applications such as a fuel line
- **Quality assurance:** DIN 3017-1

Single lip fixing clamps - SL series W1 (13 mm)

Fixing clamps affix hoses, pipes and cables to their proper places. It is also known as duct clamp. The rubber part of the band absorbs vibration and prevents cable damage, while having an added insulating effect. This clamp may also be used without the rubber lining, e.g. when they are intended to conduct electricity

- **Material:** Mild steel, all parts zinc plated
- **Lining:** Rubber, shore hardness 65 °C ± 5 °C
- **Fastening:** M6 screw
- **Industry recommendations:** Mainly used on air, fluid, gas and steam lines and also suitable for low pressure hydraulic applications. The absence of a screw mechanism allows these clips to be useful on extremely small hoses
- **Quality assurance:** DIN 2768-vL

BUNDLING & PROTECTION

Grommets

- Material: Rubber
- Great protection for cables, because rubber grommets cover sharp edges that could snare cables, cords and wires
- Extremely durable because of their resistance to tears and abrasions, giving the grommets an enhanced durability for any automotive, machining or manufacturing installations
- Weather resistant because the grommets are made with neoprene, which has great resistance to outdoor environments and electricity
